

## #WeAreHereForYou

To provide the safest environment for our **patients, providers, and families** we have implemented the following new office protocols and procedures

### Limited Visitors:

One parent or essential caretaker will be allowed to accompany the patient.

### New Screening Process:

To ensure safety of families and staff we will require additional information when scheduling appointments.

### Longer Appointments:

To allow enough time to follow new ADA and sanitation guidelines our office has extended operator, hygiene, and emergency appointments. Please plan for extra time during your visit.

### Paperless System:

Our office is now moving to our paperless system to encourage less touch points. Please provide a working email and cell phone number to allow for two-way texting and transfer of paperless documents.

### Protection Equipment Including:

Partitions, Air Purifiers, Face Shields, Sneeze Guards, Touch Free Thermometers, and Additional Low Aerosol (Dryshield)

### Complete Electronic Check-In:

Per ADA guidelines, all lobbies will be CLOSED. All visitors and patients will be asked to wait in their cars until the appointment begins. Upon your arrival, please text the office. A member of our staff will complete check-in and provide further instructions.

### Temperature Checks:

Upon arrival each guest and patient will have their temperature taken with a touchless thermometer.

### Hand Sanitation Requirements:

Hands must be washed or sanitized before moving into the clinical area.

### PPE Requirements:

Patients and Parents **MUST** wear a mask in the facility.

**THANK YOU FOR YOUR PATIENCE AND SUPPORT.**  
**TOGETHER WE CAN BUILD A SAFER PRACTICE.**
